10. Appendix E: Full Scope of Data 20

1. Introduction to the Sharing

This Data Sharing Agreement [DSA] documents how the parties to this agreement, listed in Appendix A, will share information about young people. By signing this Agreement, the named agencies agree to accept the conditions set out in this document, according to their statutory and professional responsibilities, and agree to adhere to the procedures described.

This Agreement has been developed to:

- Define the specific purposes for which the signatory agencies have agreed to share information.
- Outline the Personal, Special Category and Criminal Data to be shared.
- Set out the lawful basis condition under UK GDPR and Data Protection Act 2018 through which the information is shared, including reference to the Human Rights Act 1998 and the Common Law Duty of Confidentiality.
- Stipulate the roles and procedure that will support the processing/sharing of information between agencies.
- Describe how the rights of the data subject(s) will be protected as stipulated under the data protection legislation.
- Describe the security procedures necessary to ensure that compliance with responsibilities under data protection legislation and agency-specific security requirements.
- Describe how this arrangement will be monitored and reviewed.
- To illustrate the flow of information from referral through processing and outcome.

Parties to this agreement cannot amend or add appendices unless agreed as part of a formal review. It is expected that each party will have procedures, processes and policies sitting underneath this agreement, for their respective organisations. These will, for example, describe the specific processes for secure transfer of data.

1.1. Ownership of this agreement

This agreement was drafted by a working group of representatives of the local authorities and London Councils. These professionals were specialists in information governance and law. The local authority representatives worked under the banner of the Information Governance for London Group (IGfL), to draft one agreement that would work for all boroughs across London. The aim is to reduce the number of versions of sharing agreements that historically differed between boroughs, partly to reduce the burden on pan-London organisations, that must have agreements with multiple boroughs.

IGfL, a group of information and security professionals at London boroughs, assisted with co-ordination of this agreement, but the responsibilities within it, and compliance with data protection legislation, remain with the listed data controllers.

1.2. Responsibilities of parties involved

The parties are registered Data Controllers under the Data Protection Act. Signatories are identified as those who have signed this agreement on the platform on which this agreement is hosted (expected to be the Information Sharing Gateway). A list of expected types of signatories is at Appendix A.

All parties confirm that they comply with data protection legislation by:

- having a lawful basis for processing and sharing personal data.
- ensuring data quality.
- storing and sharing information securely, with access management controls.
- having policies and procedures for compliance with data protection legislation including for managing data subject rights & complaints, identifying and managing data breaches/incidents and retention & disposal.
- ensuring that mandatory training is undertaken regularly by their employees to ensure they are clear and up to date on their responsibilities. Every individual must uphold the principles of this agreement and overarching confidentiality and seek advice from the relevant Data Protection Officer when necessary.
- undertaking appropriate data protection due diligence checks with any contractors/data processors they employ and ensuring that a written agreement is in place with each data processor, and that all data processors will be bound by this agreement.
- having written processes for the processing of data to ensure employees use and share personal data in line with data protection law, the data protection principles, and this agreement.

Organisations and their staff must consult the organisation's Data Protection Officer/Information Governance Manager and/or Caldicott Guardian if they are unsure at any point in the processing and sharing of personal data.

1.3. Confidentiality and vetting

Each Partner must ensure that there are appropriate written contracts or agreements with employees, agency staff, volunteers etc. These must include requirements to ensure compliance with policies which include confidentiality.

Each Partner must ensure that suitable vetting has taken place.

1.4. Assessment and review

A review of this information sharing agreement will take place at the end of the pilot phase, as part of the decision on whether to move into the efficacy phase of the project. The aim of the review will be to ensure the purposes are still relevant, there has been no scope creep, the benefits to the data subjects and organisations are being realised, and the procedures followed for information security are effective.

Changes in legislation and developments in the areas of public sector data sharing will be considered as and when they arise, as will any changes to the signatory parties.

The working group who drafted this agreement strongly recommend that a working group approach is used for any reviews, as this was a successful way to achieve pan-London and cross-specialism consensus to one sharing agreement.

1.5. Termination of agreement

In the event of termination of this agreement each party may continue to hold information originating from other parties for which they are data controller.

1.6. Outside of this agreement

This DSA only covers the data collected in the LA LYPS Workbook. The IFS and Anna Freud Centre have DPIAs that cover other aspects of the LYPS.

2. Purpose and Benefits

Purpose

The London Young People Study (LYPS) is a pan-London project being run by the London Violence Reduction Unit and the Association of London Directors of Children's Services, funded by the Youth Endowment Fund (YEF). The program trains workers delivering services to young people (e.g. social workers, youth justice workers, teachers) to deliver high-intensity cognitive-behavioural therapy (CBT) informed support to young people aged 11-17, across the 32 London boroughs. This support, and the work to make it available, is branded ‘Your Choice’.

The programme creates two groups; one where selected young people receive the CBT on top of normal interventions and support; and one with the majority in a control group where only normal interventions are delivered.

Through the LYPS, Your Choice is being evaluated in London in order to determine whether the program is effective, and therefore whether it should receive funding to scale-up across the capital and nationwide. The proposed data sharing is in support of this evaluation and is a requirement of the YEF funding. The Institute for Fiscal Studies (IFS) and the Anna Freud Centre (AFC) are managing the evaluation and will gather additional data from the young people directly, and from the DfE.

We wish to process the data in order to evaluate the Your Choice program. We wish to do this for two reasons:

- Firstly, because youth violence is a serious issue affecting Londoners. Last year 5,864 were victims of the most serious violence and almost one per week was killed[1].
- Secondly because there is a lack of evidence today about what works to reduce this violence, and this lack of evidence is preventing us from mobilizing resources and from designing the best services to reduce the problem and its impact.

[1] MOPAC (2021) ‘Understanding serious violence amongst young people in London’. Accessible at https://data.london.gov.uk/dataset/serious-youth-violence.

This is a priority for London's Directors of Children's Services and the Mayor – not least because of its intersection with other priority issues including poverty, racial inequality, and health inequalities.

The output of the study will be answers to the questions

1. Are young people who receive this service more or less likely to experience serious violence than those who do not receive it?
2. Are the young people who receive this more or less likely to experience (positive or negative) criminal justice and education outcomes than those who do not?
3. What known factors (e.g. demographics, service organisation) modify these outcomes;
4. What is the cost per outcome when they are delivered through Your Choice and how does this compare to alternatives?

2.1. Benefits

The benefits of this DSA are to achieve a more comprehensive, joined up and efficient method for councils to deliver the evaluation to which they have jointly committed.

The benefits of the sharing are to allow a London-wide evaluation of the efficacy of the CBT provided to young people taking part in the programme. If the evaluation shows that the program is effective, then we can deliver better services to vulnerable young Londoners, with the aim of reducing youth violence and improving outcomes for young people.

There is very little research available about this cohort of young people and little to inform public policy on the best way to improve the outcomes for young people. This is why the Youth Endowment Fund, Violence Reduction Unit and Home Office (the sponsors of the LYPS) are so interested in this study and why the legacy of the research is such an integral part of the programme.

With so many young people dying as a result of youth violence it is in the public interest that new treatments and research be carried out on what may or may not work to reduce or prevent this tragic loss of life.

If it can be shown that the Your Choice programme can improve the outcomes of young people, it may be rolled out across England and Wales so that it has benefits for the whole country.

The DSA will:

- Cover the sharing of information for the purposes of the LYPS.
- Remove barriers to effective information sharing.
- Sets parameters for sharing personal data and clearly identifies the responsibilities of organisations.
- Identify the correct lawful basis to share personal information.
- Enables authorities to share data for the LYPS.
- Raises awareness amongst all agencies of the key issues relating to information sharing and gives confidence in the process of sharing information with others.
- Greater efficiencies in processes and resources.
- Preventing crime.
- Effectively dealing with public safety

2.2. Principles of information sharing

Effective information sharing is a vital element of delivering the LYPS. Organisations can hold different pieces of information which need to be placed together to enable a thorough evaluation to be made.

To share information, a lawful basis for doing so must be identified. This may come from legislation or from statutory guidance.

The sharing of personal data must comply with both the GDPR Principles and the Caldicott Principles, listed at Appendix B. Together, those principles lead to a series of questions and considerations to be answered before sharing takes place. These are listed as an Information Sharing Checklist in *Appendix D: Information Sharing Checklist.*

2.3. Lawful Basis

Local authorities have two main legislative drivers that cover the work of the Your Choice Programme. The Children's Act 1989, section 17, imposes a duty on local authorities to "safeguard and promote the welfare of children in need in their area". Additionally, the Police, Crime, Sentencing and Courts Act 2022, section 8(3)c, imposes a duty on local authorities and others to "prepare and implement a strategy for exercising their functions to prevent and reduce serious violence in the area".

It is considered a part of the local authority's public task (Article 6 (1)(e) to engage in this programme. Whilst the delivery of the CBT to young people is considered processing for health and social care purposes (Article 9 (2)(h), for sharing the data for research purposes the condition is substantial public interest (Article 9 (2)(g).

The evaluation carried out by IFS is considered research in the area of public authority social care duties; evaluation of the Your Choice programme as a randomised control trial. In that regard the research is primarily scientific in nature and involves controlling for all the individual characteristics of the cohort that may affect the efficacy of the Your Choice treatment element of the study.

As stated earlier, there is very little research available about this cohort of young people and little to inform public policy on the best way to improve the outcomes for the young people. This is why the Youth Endowment Fund, Violence Reduction Unit and Home Office (the sponsors of the LYPS) are so interested in this study and why the legacy of the research is such an integral part of the programme.

With so many young people dying as a result of youth violence it is in the public interest that new 'treatments' and research be carried out on what may or may not work to reduce or prevent this tragic loss of life.

If it can be shown that the 'Your Choice' treatment can improve the outcomes of young people, it may be rolled out across England and Wales so that it has benefits for the whole country.

The IFS processing of data is covered by Article 6(1)(e) public task and Article 9(2)(j).

Some personal data relating to criminal allegations and convictions is expected to be shared where it is relevant to the issues the young person raises during the programme or the evaluation of the programme.

When processing special category data, a condition from Sch 1 Pt 1, or Sch 1 Pt 2 of the DPA 2018 must be identified.

For processing data relating to criminal convictions and offences Article 10 of the UK GDPR applies, and a condition from the DPA 2018 Sch 1 Pt 3 must be identified.

The conditions relevant to the parties sharing data under this agreement are:

Article 6 conditions		Article 9 conditions	
	c) legal obligation		f) necessary for the establishment, exercise or defence of legal claims or whenever courts are acting in their judicial capacity
●	e) performance of a task carried out in the public interest	●	g) substantial public interest
●	f) purposes of the legitimate interests	●	h) purposes of preventive or occupational medicine, for the assessment of the working capacity of the employee, medical diagnosis, the provision of health or social care or treatment or the management of health or social care systems and services
			i) public interest in the area of public health, such as protecting against serious cross-border threats to health or ensuring high standards of quality and safety of health care and of medicinal products or medical devices
		●	j) archiving purposes in the public interest, scientific or historical research purposes or statistical purposes

Article 9(2) (b) (h) (i) (j) - Sch 1 Pt 1

	Employment, social security and social protection		Public health
	Health or social care	●	Research

Article 9(2) (g) - Sch 1 Pt 2

	Statutory & government purposes		Administration of justice
	Equality of opportunity or treatment		Racial/ethnic diversity at snr mgmt
	Preventing or detecting unlawful acts		Protecting the public against dishonesty
	Regulatory for unlawful acts and dishonesty		Terrorist financing or money laundering
	Preventing fraud		Support for individuals with disability or medical condition
●	Safeguarding of children and individuals at risk		Safeguarding economic well-being

Criminal data - Sch 1 Pt 3

	Legal claims		Judicial acts

	Accounts for child indecency offences	●	Extension of Sch 1 Pt 2

Consideration of the lawful basis conditions will take place as part of the review at the end of the pilot.

2.4. Consent

The parties will often work collaboratively with data subjects and aim for agreement with them on the actions to be taken. However, it is recognised that this is different to using consent (Article 6 (a)) or explicit consent (Article 9 (a)) as the lawful basis conditions used for processing under this agreement.

Consent is not generally the lawful basis the public sector organisations use for processing information shared under this agreement.

In the LYPS Your Choice Programme the young people eligible to take part in the study are asked for informed consent to be included. That consent is an ethical consideration to meet the requirement of the researchers' organisations for conducting this randomised controlled trial and ***is not*** considered to be the lawful basis for personal data processing. Whether in the CBT group or the control group, a young person cannot take part in the programme without having their personal data included in the evaluation.

If a young person chooses to leave the programme once it has begun, any data already collected with be included in the evaluation, unless the young person requests that their data be removed from the evaluation. This is part of the informed consent for the trial, and not consent as lawful basis. Once the evaluation phase has begun data cannot be deleted.

2.5. Proportionality and necessity

Proportionality

This study will impact upon the privacy of up to 4,000 young people and 1,000 staff. The privacy impact has been extensively mitigated through the programme's design and balanced against the potential benefits outlined.

We believe that the potential benefit of saving young Londoners' lives is clearly worth the processing, and that the question is therefore the extent to which we can reduce processing to the absolute minimum required to achieve this end.

Appendix E below details each field being collected, and the assessment the research team have made as to whether it could be:

- Dropped
- Degraded
- Obscured

The data items required are the end result of a long process from January 2022 through to the beginning of July of reduction, refinement and clarification of the data items required for the evaluation. Practitioners, Evaluators and the LIIA team have been involved in whittling the items down to those felt essential for a robust evaluation of the programme. This has seen items dropped, eg Religion & information about parents; Other items reduced in scope or to broad categories eg disability, practitioner information and standard definitions being used wherever possible eg ethnicity.

Necessity

To establish the quality of evidence of the program's efficacy, which is required to secure investment in youth services, we need to conduct a robust trial – an RCT (Random Controlled Trial) or a

quasi-experimental study. This will establish whether the intervention has the intended impact, and whether it represents value for money[2].

To conduct a quasi-experimental study we have to collect personal data on those receiving the service and link it to data on outcomes. This cannot be achieved without processing personal sensitive data. A study of this nature also requires that special category data (gender, sexuality, ethnicity, health) be processed so that evaluators can control for the impact of these on outcomes. Without this, we do not know whether the programme works as well for one group of people as for another.

It is also necessary that criminal offence data be processed, as reducing the likelihood that a young person will go on to be convicted of an offence is a key outcome of the program and a driver of cost-efficacy. Without this, we cannot answer how effective the programme has been.

2.6. Other relevant legislation

The actual disclosure of any personal data to achieve these objectives must also be conducted within the framework of the Human Rights Act 1998 (HRA) and the Common Law Duty of Confidence. Caldicott Principles also apply to all information sharing and they are listed in Appendix B: Data Protection & Caldicott Principles.

- Human Rights Act 1998 (HRA)
- Common law duty of confidentiality
- Confidentiality and Sharing for Direct Care

2.7. Freedom of Information

The Freedom of Information Act 2000 gives all individuals the right to access official information held by a public authority (the Environmental Information Regulations 2004 also allow access to data. For ease of drafting, FOI is used to cover both legislation). Limited exemptions may apply and all public authorities must ensure they have recognised procedures in place for administering requests of this nature.

All requests for FOI will be directed through the relevant organisations' FOI processes. Each party will seek advice/opinion from the other parties where there is concern about that information being released and any impact it is likely to have. The final decision to disclose or not will lie with the party who holds the information (data controller).

It is encouraged that all parties proactively publish this document. It may also be disclosed to the public under FOI.

3. Individuals

Organisations processing personal data are required to begin with the ethos of Data Protection by Design and Default (also known as Privacy by Design (PbD). This means that we must consider and uphold the privacy of an individual's data before we begin and throughout the processing taking place.

IGfL will consider this DSA and the related DPIA on behalf of London. Individual parties may wish to undertake their own DPIA/ DSA.

3.1. Right to be informed – Privacy notices

Where personal data is created or received by one of the parties, they are responsible, as required by law, for making the data subject(s) aware within a reasonable time frame that the organisation holds the data, what they will do with it, how long they will keep it, and who they will share it with (such as under this DSA). This is normally done through a privacy notice, whether written or verbal. Organisations agree that they will adhere to the transparency requirements of the UKGDPR and will issue appropriate notices which inform the data subject that the information will be shared with the parties under this agreement.

In some cases, it may not be appropriate to let a person know that information about them is being processed and shared. Consideration should be given to whether notifying the individual may place someone at risk or prejudice a police, other criminal, or safeguarding investigation. In these circumstances, the parties need not inform individuals that the information is being processed/shared; but should record their reasons for sharing information without making the individual aware.

The Institute for Fiscal Studies (IFS) will provide the young people (and their parents where appropriate) with a privacy notice explaining the use of the data they collect directly from the young person and practitioner (covered by their own DPIA). This will include the data collected from the local authorities and covered by this DSA. It also covers the information collected by the Anna Freud Centre through interviews with Young People who have agreed to be interviewed (covered by their own DPIA).

It is expected that existing local authority privacy information for children's social care will cover the local authority engagement with young people who are taking part in the programme.

3.2. Data subject rights requests and complaints

Here we describe data subject rights in respect of the administrative information being shared by LAs to the IFS for the purpose of evaluation, as this is the scope of the DPIA/DSA. We do not describe data subject rights in respect of the surveys conducted and information gathered directly from the young people by the IFS and the Anna Freud Centre.

In all cases, data subject requests will be passed to each of the data controllers to decide and act upon. The information below details how an instruction from the controller is translated into action.

LAs (processing on basis of public task)

Right	Applicability	How it Is Delivered
To Be Informed	Yes	Privacy notices at LA and IFS.
To Access	Yes	All controllers have a process for identifying and complying with requests, and for notifying other controllers.
To Rectification	Yes	
To Be Forgotten	No.	
To Portability	Yes	
To Restrict Processing	Yes	

To Object	Yes	
To Object to Automated Processing	Inapplicable. No automated processing in scope	N/A

IFS

Right	Applicability	How it Is Delivered
To Be Informed	Yes	Privacy notices at LA and IFS. Plain English explanation on consent forms.
To Access	Yes	All controllers have a process for identifying and complying with requests, and for notifying other controllers.
To Rectification	Yes	
To Be Forgotten	Yes. Section 2 exemption (research) inapplicable as compliance with SAR would not impair achievement of purpose.	
To Portability	No – data not provided to these controllers by the subject	
To Restrict Processing	Yes	
To Object	Yes	
To Object to Automated Processing	Inapplicable. No automated processing in scope	N/A

3.3. Data subjects

We expect to process data on up to 5,000 people over the life of the program across all the London Boroughs taking part in LYPS, as detailed in the table below. Each London Borough will therefore have approximately 1/30th of the numbers given below depending on the duration of their involvement in LYPS, their success in recruiting participants and the numbers of practitioners & teams involved. These figures are a best estimate based on the plans of the LYPS.

Stage	Pilot	Efficacy	Total
Number of Young People (of whom c. 50% are in the control group and thus not receiving the intervention)	450	3,550	4,000
Number of Staff (of whom 50% are in the control group)	400	600	1,000
Total People	850	4,150	5,000

4. Data

The personal data and its processing involved in these workstreams is extensive, highly sensitive and at times intrusive. There is by necessity a comprehensive amount of data required about the data subjects.

Information will include personal, special category and criminal data to enable:

- Evaluation of the service for efficacy and cost efficacy;
- Exploration of how protected characteristics (among others) influence how the service is used by young people and moderates what outcomes they achieve.

Protected characteristic data is listed along with the other data in Appendix E denoted as ‘Personal sensitive data’.

4.1. The data to be shared

There are different sectors within the study. Young people will be asked whether they wish to take part. For those that do not choose to take part, a small amount of anonymous data will be gathered to enable IFS as evaluators to identify whether there are potential trends as to why a young person did not wish to take part in the study. This data is age/ gender/ ethnicity/ reason for not taking part.

If a young person chooses to take part in the study, they will be assigned to the CBT group or the control group.

The precise fields we intend to process, the rationale for each, and consideration of whether they could be degraded or obfuscated is detailed in Appendix E. This also outlines which fields are retained by the IFS and Youth Endowment Fund (YEF) respectively for future research.

In summary, the scope of processing in the flow from LAs to the Institute for Fiscal Studies (IFS) includes the following information about the young people:

- Personal information, including: full name, date of birth, and unique identifiers (e.g. Unique Pupil Number) where available (Not passed to YEF – their data archive is pseudonymised)
- Special category information, including: racial or ethnic background; gender; sexuality; disability
- Data relating to criminal conviction: not explicitly requested but may be recorded in free text explanations of why young people have been referred to the program or in a description of their needs and their history of interaction with services (e.g. youth offending teams)
- Other information may be harmful if disclosed, including: special educational needs; social care ‘child in need’ and ‘child looked after’ status; education, employment and or training status; involvement with other council services; the fact that they were involved in the service (a condition for which is relevant LA or school staff’s assessment that they are at high risk of involvement in serious violence as victim or offender).

The workbook captures the data typically 'owned' by the LA for statutory service delivery. Other information that is specifically related to the study or comes from the young person themselves are collected through a series of survey forms and subject interviews in the data collected directly by IFS and AFC and covered by their DPIAs.

4.2. Deceased persons

The sharing is unlikely to involve data of deceased persons, but where it does it is noted that this data will not be covered by data protection legislation but will still require due regard to the common law duty of confidentiality and the Human Rights Act.

4.3. Confidential information

In this agreement, we refer to personal data, as defined by data protection legislation. However, the word 'confidential' may be used by individuals and practitioners to describe information and can mean different things to different people.

Confidential can mean:

- Personal and special category data as defined by data protection legislation
- Patient Identifiable Information (PII) or 'personal confidential information'; both terms most commonly used in health settings
- Information which is not already lawfully in the public domain or readily available from another public source
- Information that has been provided in circumstances where the person giving the information could reasonably expect that it would not be shared with others.

4.4. Storing and handling information securely

The data is protected at each step, whilst at rest and in transmission. The specifics are outlined below.

At the Local Authority

Local Authorities' own processing of this data is not novel or controversial and we assume it to be handled with existing child social care data systems. Data collected for the LYPS is considered part of a local authority's duties and this agreement focuses on the novel elements, which are the sharing to the IFS for evaluation.

In Transmission from LAs to the IFS

Data is sent to a named individual within the IFS Sarah Cattan (sarah_c@ifs.org.uk). Standard operating procedures for LA staff involved in the program include:

- Data cannot be sent to a role-based account
- Data cannot be sent to an account outside the ifs.org.uk domain
- The individual to whom they can send data is to be authorised by the named program lead at London Councils and variations only accepted on instruction from the same.

Data is sent via encrypted email using the egress switch service, which uses identity-based AES 256-bit encryption with FIPS 140-2 approved cryptographic libraries as default on its endpoints. For more information on technical, physical and organizational measure in place at the egress service see https://www.egress.com/security/measures-and-controls.

Where the LA does not use Egress, we will require them to use a similar secure email system, such as Mimecast which meets the same levels of protection.

For more information on Technical and organizational Security measures in place at Mimecast see https://www.mimecast.com/company/mimecast-trust-center/technical-and-organizational-measures/email-and-web-security-services

Alternatively the IFS operate a secure web portal that can be used by LAs who do not have a secure email service meeting the required level of security.

At the IFS

Data will be stored on an encrypted network of the Institute for Fiscal Studies (IFS) in a secure folder with access restricted to named researchers who need to work on the data for the purpose of the evaluation. Access to folders is controlled by ICT with approval from the Head of Data Services.

All IFS ICT systems are managed by staff directly contracted by ISF. IFS use Azure cloud storage for back up. Azure complies with ISO27001 as well as a number of other compliance standards.[2]

The IFS information security management system is ISO27001 compliant, and the IFS has an Information Classification and Handling Policy which sets out a comprehensive set of guidelines for handling all types of data and information (including highly confidential information).

IFS also is Cyber Essentials Certified. All project team members will follow strict procedures in this policy and adhere to the IFS Information Security Policy when using or collecting data. All project team members will have received appropriate GDPR and data security training. All researchers on this project are ONS accredited researchers.

The Cloud Security Questionnaire has further details.

4.5. Access controls and security

All parties will ensure that they have appropriate technical and organisational security measures in place to guard against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data.

All personal data held by partner organisations electronically will be stored in a secure network area with password protected entry and appropriate back-up functionality. The systems will be auditable so that it is possible for any auditor to establish who has accessed the system. All laptops, computers, and any other portable devices will be encrypted.

Any individual no longer required to have access will promptly have such access revoked by the line manager and Human Resources related to the relevant employer.

There is an expectation that partner organisations will either be working toward ISO 27001, the International Standard for Information Security Management, or a similar standard of security.

At the end of the efficacy part of the LYPS (currently scheduled for the second half of 2024), identifiable data will be held separately on the IFS Data Enclave. The data relating to this project held on the IFS data enclave can only be accessed by Approved Enclave Users who are also required to sign the Data Enclave Access Agreement and have BPSS (Baseline Personnel Security Standard) clearance.

IFS data Enclave:

The system (except the server and some cabling) is contained entirely within a physically secured room. The door is locked with an access card reader and a keypad.

The Enclave server is contained within a separate secure room which is locked with a key.

The access card system is used throughout the IFS to control access to different areas. Access is assigned by IT Services. Ability to enter the Enclave is only given to staff who have been approved to use the Enclave as outlined in Section 2.4 and who have signed the Data Enclave Access Agreement (hereafter referred to as “Approved Person(s)”).

As a secondary security measure, Approved Users will also need to obtain the number code to unlock the door from the Head of Data Services, the Head of ICT or the IT Support and Systems Administrator.

[2] https://docs.microsoft.com/en-us/azure/compliance/

Audit

Visits to the Enclave are recorded via the Door Access System. Logs are kept for three months.

Logs of data access are recorded electronically using the in-built computer auditing tools.

Details of any outputs removed from the Enclave will be recorded in a Logbook

Spot check on outputs removed from the Enclave are carried out by the Head of Data Services

Directory access is strictly controlled and regularly reviewed by the Support and System Administrator and the Head of Data Services.

Access to portable media interfaces (USB ports, disc drives) are disabled for everybody except IT Support and the Head of Data Services.

4.6. Outside UK processing

Parties are responsible for ensuring that if information is processed or shared outside the UK, that suitable written agreements are in place, and that appropriate due diligence has been completed for the transfer of data.

4.7. Data quality

Each partner is responsible for ensuring the accuracy and relevance of the personal data that it processes and shares and must have clear processes in place for managing data quality.

Any party learning of the inaccuracy of personal data is responsible for informing the parties with whom that data has been shared.

4.8. Data breaches/incidents

All parties must have a clear policy and procedure regarding the reporting and handling of data protection breaches or data loss incidents. This must include assessing the level of risk to the data subject(s), as well as to make a decision on notifying the ICO within the statutory time frame of 72 hours. This complies with Articles 33 and 34 of UKGDPR, and Section 67 and 68 of the DPA 2018 for personal data processed for law enforcement purposes.

If the incident may impact the processing of another party to this agreement, all relevant parties should be informed and appropriate co-ordination of the incident must take place. The decision to report the incident will lie with the data controller(s) of the information concerned. The parties agree to provide all reasonable and necessary assistance at their own expense to each other to facilitate the handling of any personal data breach in an expeditious and compliant manner.

It is confirmed that security breaches (including misuse or unauthorised disclosure) are covered by the partner's internal disciplinary procedures. If misuse is found there should be a mechanism to facilitate an investigation, including initiating criminal proceedings where necessary.

4.9. Retention & Disposal

Organisations are required by data protection legislation to document processing activities for personal data, such as what personal data is held, where it came from and with whom it has been shared. This Record of Processing Activity (ROPA) must include the retention period for the data.

Information must not be retained for longer than necessary for the purpose for which it was obtained. Disposal or deletion of personal data once it is no longer required, must be done securely with appropriate safeguards, in accordance with that organisation's disposal policies.

The original data provided by each LA will be combined with the data that the IFS is collecting directly from the young people and practitioners to create a new dataset. At this point the IFS becomes the Data Controller for this new dataset. The LA has no Data Controller responsibilities for the new dataset.

At the end of the efficacy trial (or the end of the pilot phase if the decision is made to not proceed to efficacy) the original LA data files will be destroyed.

5. Signatures

Institute for Fiscal Studies

The Institute for Fiscal Studies will sign this DSA via a centralised electronic system rather than physically signing a document.

Local Authorities:

All local authorities signing this DSA will do so via a centralised electronic system rather than physically signing a document.

Version control	
Document production date	30 November 2022

6. Appendix A – Parties to this agreement

The 32 London Boroughs
The Institute for Fiscal Studies

7. Appendix B: Data Protection & Caldicott Principles

The Principles as described in Article 5 of the General Data Protection Regulation.

1) Fair & Lawful
processed lawfully, fairly and in a transparent manner in relation to the data subject

2) Purpose limitation
collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes

3) Data minimisation
adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed

4) Accuracy
accurate and, where necessary, kept up to date; Inaccurate data must be erased or rectified without delay

5) Storage limitation
kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed

6) Integrity & Confidentiality
secured through appropriate technical or organisational measures, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage.

The Caldicott Principles

Principle 1
Justify the purpose(s) for using confidential information
Every proposed use or transfer of confidential information should be clearly defined, scrutinised and documented, with continuing uses regularly reviewed by an appropriate guardian.

Principle 2
Use confidential information only when it is necessary
Confidential information should not be included unless it is necessary for the specified purpose(s) for which the information is used or accessed. The need to identify individuals should be considered at each stage of satisfying the purpose(s) and alternatives used where possible.

Principle 3
Use the minimum necessary confidential information
Where use of confidential information is considered to be necessary, each item of information must be justified so that only the minimum amount of confidential information is included as necessary for a given function.

Principle 4
Access to confidential information should be on a strict need -to-know basis
Only those who need access to confidential information should have access to it, and then only to the items that they need to see. This may mean introducing access controls or splitting information flows where one flow is used for several purposes.

Principle 5
Everyone with access to confidential information should be aware of their responsibilities
Action should be taken to ensure that all those handling confidential information understand their responsibilities and obligations to respect the confidentiality of patient and service users.

Principle 6
Comply with the law
Every use of confidential information must be lawful. All those handling confidential information are responsible for ensuring that their use of and access to that information complies with legal requirements set out in statute and under the common law.

Principle 7
The duty to share information for individual care is as important as the duty to protect patient confidentiality
Health and social care professionals should have the confidence to share confidential information in the best interests of patients and service users within the framework set out by these principles. They should be supported by the policies of their employers, regulators and professional bodies.

Principle 8
Inform patients and service users about how their confidential information is used
A range of steps should be taken to ensure no surprises for patients and service users, so they can have clear expectations about how and why their confidential information is used, and what choices they have about this. As a minimum, this should include providing accessible, relevant and appropriate information. In some cases, greater engagement will be required.

8. Appendix C – Applicable legislation

Legislation	Main purpose of Legislation
Police, Crime, Sentencing and Courts Act 2022, section 8(3)c	Imposing a duty on local authorities and others to "*prepare and implement a strategy for exercising their functions to prevent and reduce serious violence in the area*"
Children's Act 1989, section 17	Imposing a duty on local authorities to "*safeguard and promote the welfare of children in need in their area*"

9. Appendix D: Information Sharing Checklist

The following questions must be considered when deciding whether to share information.

- Whose information is this?
- Is there a lawful basis to share the information? Justify the purpose and identify relevant legislation that applies.
- Can information be pseudonymised or anonymised ahead of sharing?
- How have individuals been informed that the information will be shared eg via a privacy notice? Will they have the expectation that their information will be shared? Consider whether notifying the individual of the sharing may place someone at risk or prejudice a police or safeguarding investigation.
- Have any requests not to share been received and considered?
- How much information is it necessary to share in this situation?
- Is the information accurate and up to date? Has the difference between fact and opinion been stated?
- Is access to the information limited to only those who need it? Is it being given to the right person?
- Is the information being shared in a secure way?
- Has the decision to share or not share been recorded?

10. Appendix E: Full Scope of Data

Tab on spreadsheet	Data Item	Type of data	Nature of data input	Defined options if applicable	Data description	Reason for collection	Shared with evaluators?	Can it be degraded?	Can it be obscured?
Front Page	LA Name	No personal data	defined option - selection from locked drop-down list	List of London LA names	Name of the LA to whom data relates	To be able to track roll-out of project, return of data, provide and link to information about constituent teams of control and treatment groups, to inform evaluation controlling for different types of team and service delivery	Yes	No	No
CYP participating in programme in control (CG) or treatment group (YC)	CYP ID	Personal data	Data copied from LA Database	n/a	unique client ID assigned to young person on service database	To be able to link data collected from worker on sessions delivered with the child or young person (CYP)	Yes	No, relies on an exact match	No
	UPN	Personal data	Data copied from LA Database	n/a	education unique pupil number if available	To be able to link administrative data on CYP outcomes to CYP in programme. To evaluate impact of programme and as a control measure *eg comparing outcomes of CYP with similar previous attainment in treatment & control groups*	Yes	No, relies on an exact match	In theory, we could get LAs to encrypt these and give the keys to MoJ and DfE but not to other parties. This would reduce re-identification risk but would be slow and expensive to a degree which I suggest it is disproportionate.
	ULN	Personal data	Data copied from LA Database	n/a	further education unique learner number if available	To be able to link administrative data on CYP outcomes to CYP in programme. To evaluate impact of programme and as a control measure *eg comparing outcomes of CYP with similar previous attainment in treatment & control groups*	Yes	No, relies on an exact match	In theory, we could get LAs to encrypt these and give the keys to MoJ and DfE but not to other parties. This would reduce re-identification risk but would be slow and expensive to a degree which I suggest it is disproportionate.

	CYP Forenames	Personal data	Data copied from LA Database	n/a	legal first names of young person	To link to survey data collected directly from young people for qualitative evaluation of impact of programme. Where unique identifier not available, in combination with other CYP name fields and DoB, to be able to link administrative data on CYP outcomes to CYP in programme. To evaluate success of programme and as a control measure *eg comparing outcomes of CYP with similar previous attainment in treatment & control groups*	Yes	No, relies on an exact match	In theory, we could get LAs to encrypt these and give the keys to MoJ and DfE but not to other parties. This would reduce re-identification risk but would be slow and expensive to a degree which I suggest it is disproportionate.
	CYP last name	Personal data	Data copied from LA Database	n/a	legal surname of young person	To link to survey data collected directly from young people for qualitative evaluation of impact of programme. Where unique identifier not available, in combination with other CYP name fields and DoB, to be able to link administrative data on CYP outcomes to CYP in programme. To evaluate success of programme and as a control measure *eg comparing outcomes of CYP with similar previous attainment in treatment & control groups*	Yes	No, relies on an exact match	In theory, we could get LAs to encrypt these and give the keys to MoJ and DfE but not to other parties. This would reduce re-identification risk but would be slow and expensive to a degree which I suggest it is disproportionate.
	DoB	Personal data	Data copied from LA Database	n/a	(dd/ mm/ yy)	To link to survey data collected directly from young people for qualitative evaluation of impact of programme. Where unique identifier not available, in combination with other CYP name fields and DoB, to be able to link administrative data on CYP outcomes to CYP in programme. To evaluate success of programme and as a control measure *eg comparing outcomes of CYP with similar previous attainment in treatment & control groups*	Yes	No, relies on an exact match	In theory, we could get LAs to encrypt these and give the keys to MoJ and DfE but not to other parties. This would reduce re-identification risk but would be slow and expensive to a degree which I suggest it is disproportionate.
	Age	Personal data	Calculation from DoB - measures between DoB and 'today'	Calculated field	Age based on DoB	For teams to be able to quickly see age of CYP, to ensure CYP is age eligible, to inform LA monitoring of age of CPY participants to monitor for bias in age groups and/ or disapplication by CYP of specific ages	No	No	n/a

	Gender	Personal sensitive data	defined option - selection from locked drop-down list	Gender table	select most appropriate option	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
	Ethnicity	Personal sensitive data	defined option - selection from locked drop-down list	Ethnicity table	select most appropriate option	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	Not without undermining the benefits of the study, specifically the ability to understand differences in how children of different characteristics experience and benefit from the intervention.	No
	Disability	Personal sensitive data	defined option - selection from locked drop-down list	Disability table	choose as many options as apply or if no disability leave blank	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	Is already degraded to only physical/ mental/ learning difficulties /other. Further degradation (to yes/no) would undermine the benefits of the study.	No
	LGBTQ+	Personal sensitive data	defined option - selection from locked drop-down list	LGBTQ+ table	If young person considers themselves to be in any of the groups associated with LGBTQ+ please choose yes	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	Not without undermining the benefits of the study, specifically the ability to understand differences in how children with different characteristics experience and benefit from the intervention.	No

	Looked after	Personal data	defined option - selection from locked drop-down list	Yes/ No	If young person is looked after please choose yes	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
	SEND	Personal data	defined option - selection from locked drop-down list	Yes/ No	If young person has special educational needs please choose yes	To inform LA monitoring of age of CYP participants to monitor for bias and/ or disapplication by CYP of specific characteristics. As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
	In Education/ Training/ Employment? When starting in programme	Personal data	defined option - selection from locked drop-down list	Yes/ No	select most appropriate option to indicate if young person is in EET at the start of work with them in the Your Choice treatment group or Your Choice control group	To be able to monitor change in EET outcomes during the course of the programme delivery with CYP. Informs evaluation of Impact	Yes	No	No
	In Education/ Training/ Employment? When ending with programme	Personal data	defined option - selection from locked drop-down list	Yes/ No	select most appropriate option to indicate if young person is in EET at the end of work with them in the Your Choice treatment group or Your Choice control group	To be able to monitor change in EET outcomes during the course of the programme delivery with CYP. Informs evaluation of Impact	Yes	No	No
	Previously received Your Choice treatment?	Personal data	defined option - selection from locked drop-down list	Yes/ No	if young person has previously received a complete Your Choice treatment or ended their involvement prematurely during an earlier episode please choose the 'yes' option	To be able to control for CYP who effectively receive more treatment than the programme typically delivers. To allow LAs to monitor young people who are coming through their system with similar risk levels or who are changing their minds about taking part in the programme	Yes	No	No
	Worker name	Personal data	Feed from field on Worker tab	Populated field	Forename & surname of worker	For LA use, to enable easy monitoring of who to contact for missing data, as a means of reducing data input on spreadsheets.	No	No	No
	Worker ID	Personal data	Feed from field on Worker tab	Populated field	unique worker ID assigned to worker on service database	Used to link worker details between tabs and to link with session information completed by worker and submitted directly to evaluators.	Yes	No	No

Start date of current 'episode'	Personal data	Data copied from LA Database	n/a	Date on which young person first came to the attention of your service in this current episode (dd/ month/ yyyy)	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
Most relevant primary need	Personal data	defined option - selection from locked drop-down list	Most relevant primary need table	choose the primary 'need' from the drop-down list that is closest to the young person's needs - uses children in need definitions	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	Potentially - the standard categorisation has 23 non-exclusive options - but this would significantly degrade the benefits of the study and would not significantly reduce re-identificatio n risk.	No
Involved with other council service?	Personal data	defined option - selection from locked drop-down list	Yes/ No	answer 'yes' if young person is currently receiving a service from another part of the council (Y/N)	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
Start date of 'episode' with other service	Personal data	Data copied from LA Database	n/a	date on which young person first came to the attention of other service in their current episode (dd/ month/ yyyy)	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
Name of other service	No personal data	Data copied from LA Database	n/a	name of other council service being received simultaneously by young person	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
Reason for involvement with other service	Personal sensitive data	inputter free text entry	n/a	function/ service being fulfilled/ delivered by other council service - this could be due to statutory requirements or for other reasons	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups*	Yes	No	No
Your choice or control group?	Personal data	defined option - selection from locked drop-down list	YC/ CG	if young person will be receiving 'Your Choice' treatment use 'YC', if in control group use 'CG'	Critical to identifying if young person is receiving treatment or business as usual service. Without this it would not be possible to evaluate impact of randomised controlled trial (RCT)	Yes	No	No

	Data referred to programme	No personal data	inputter date entry	n/a	date young person meeting criteria is assigned to the Your Choice treatment or control group	To enable measurement of length of involvement with young person as part of Your choice programme. To monitor and control for delays to start of programme delivery	Yes	No	No
	Date commenced on programme	No personal data	inputter date entry	n/a	date that Your Choice treatment begins	To enable measurement of length of involvement with young person as part of Your choice programme	Yes	No	No
	Date Ceased on programme	No personal data	inputter date entry	n/a	date Your Choice treatment or work with control group ends, young person opts out of programme or treatment/ work ends for another reason	To enable measurement of length of involvement with young person as part of Your choice programme	Yes	No	No
	Summary of work with young person	Personal sensitive data	inputter free text entry	n/a	brief description of the interventions being received by young people from this service and any other council services during the period in the Your Choice treatment programme or control group. If the worker changes, please mention that here (whilst showing the new worker against the child on this page and entering the workers details on the worker tab (if the worker is not already on that tab) and give a brief description of why. If the young person leaves the programme prematurely - because they opt out or move to another LA, please state this and a brief description of the reasons for this here. applies to YC treatment group and the control group	As a control measure *eg comparing outcomes of CYP with same/similar characteristics in treatment & control groups, with similar experiences of involvement with the system.* Also to capture information about why a young person ends involvement prematurely - relevant to evaluation of impact, do certain groups not make it to the end etc.	Yes	No	No
Workers involved in programme in control (CGT) or Treatment (YCT) or	Worker name	Personal data	Data copied from LA Database	n/a	Forename & surname of worker	For LA use, to enable easy monitoring of who to contact for missing data, as a means of reducing data input on spreadsheets.	No	No	No

Wider (WT) or Other (OTH) Teams	Worker ID	Personal data	Data copied from LA Database	n/a	unique worker ID assigned to worker on service database	Used to link worker details between tabs and to link with session information completed by worker and submitted directly to evaluators.	Yes	No	No
	Worker role	Personal data	Data copied from LA Database	n/a	service or organisation name for the workers role eg Social Worker, Youth Offending Team Worker, Speech & Language Therapist (SALT), substance misuse worker	As a control measure *eg comparing CYP with workers in the same/ similar roles and controlling for interventions by other workers that impact on outcomes so impact that is **only** from Your Choice can be more clearly evaluated and impact of programme accurately assessed*	Yes	No	No
	Service or organisation type	No personal data	Data copied from LA Database	n/a	Service name or if part of 'wider team' type of organisation eg VCS, School, Speech & Language service	As a control measure *eg comparing CYP involved with services delivering the same/ similar interventions within the same systemic framework so impact that is **only** from Your Choice can be more clearly evaluated and impact of programme accurately assessed*	Yes	No	No
	Team or organisation name	No personal data	Data copied from LA Database	n/a	Team name (& number if relevant) or if other organisation name/ school name/ unit name	As a control measure *eg comparing CYP involved with teams delivering the same/ similar interventions within the same systemic framework so impact that is **only** from Your Choice can be more clearly evaluated and impact of programme accurately assessed*	Yes	No	No
	Your choice, control group or wider team	No personal data	defined option - selection from locked drop-down list	Your Choice team/ Control group team/ Wider Team/ Other table	if worker will be delivering 'Your Choice' treatment use 'YCT', if worker is in control team use 'CGT', if in wider team 'WT'. If worker is someone outside the wider team please use 'OTH'.	Critical to identifying if young person is receiving treatment or business as usual service. Without this it would not be possible to evaluate impact of randomised controlled trial (RCT)	Yes	No	No
	Date worker commenced 5-day training	No personal data	please enter date	n/a	date worker started Your Choice training (if in YCT group)	To measure that time taken for worker to complete the first four days of Your Choice training, delays may have an impact on training efficacy	Yes	No	No
	Date worker completed first 4 days of training	No personal data	please enter date	n/a	date worker completes the fourth day of Your Choice training (if in YCT group)	To measure that time taken for worker to complete the first four days of Your Choice training, delays may have an impact on training efficacy	Yes	No	No

Worker Clinical Supervision	Worker name	Personal data	Feed from field on Worker tab	Populated field	Forename & surname of worker	For LA use, to enable easy monitoring of who to contact for missing data, as a means of reducing data input on spreadsheets.	No	No	No
	Worker ID	Personal data	Feed from field on Worker tab	Populated field	unique worker ID assigned to worker on service database	Used to link worker details between tabs and to link with session information completed by worker and submitted directly to evaluators.	Yes	No	No
	Service	No personal data	Feed from field on Worker tab	Populated field	Service name	As a control measure *eg comparing CYP with workers in the same/ similar roles and controlling for interventions by other workers that impact on outcomes so impact that is **only** from Your Choice can be more clearly evaluated and impact of programme accurately assessed*	Yes	No	No
	Team name	No personal data	Feed from field on Worker tab	Populated field	Team name (& number if relevant)	As a control measure *eg comparing CYP involved with services delivering the same/ similar interventions within the same systemic framework so impact that is **only** from Your Choice can be more clearly evaluated and impact of programme accurately assessed*	Yes	No	No
	Date of clinical supervision	No personal data	inputter date entry	n/a	Date when supervision was delivered (dd/ month/ yyyy)	Relates to potential impact of clinical supervision - a key element of Your Choice - on efficacy of programme. A control measure to allow for differences in frequency, availability, types of supervision and potential impact on treatment delivery & efficacy	Yes	No	No
	Type of supervision	No personal data	defined option - selection from locked drop-down list	Individual/ Peer	Was this Individual or Peer supervision?	Relates to potential impact of clinical supervision - a key element of Your Choice - on efficacy of programme. A control measure to allow for differences in frequency, availability, types of supervision and potential impact on treatment delivery & efficacy	Yes	No	No
Eligible but not participating	CYP ID	Personal	Data copied from LA Database	n/a	unique client ID assigned to young person on service database only here to prevent duplicates being recorded -	For LA use, to enable easy monitoring of duplicates and for error checking	No	No	No

				will not be shared with evaluators				
	Age	Personal	defined option - selection from locked drop-down list	Age table	select age of CYP	To monitor characteristics of CYP not engaging in programme, to check there is no system bias or discrimination preventing young people taking part or other reasons that may indicate certain cohorts do not see Your Choice as relevant for them	Yes	No	No
	Gender	Personal sensitive data	defined option - selection from locked drop-down list	Gender table	select most appropriate option	To monitor characteristics of CYP not engaging in programme, to check there is no system bias or discrimination preventing young people taking part or other reasons that may indicate certain cohorts do not see Your Choice as relevant for them	Yes	No	No
	Ethnicity	Personal sensitive data	defined option - selection from locked drop-down list	Ethnicity table	select most appropriate option	To monitor characteristics of CYP not engaging in programme, to check there is no system bias or discrimination preventing young people taking part or other reasons that may indicate certain cohorts do not see Your Choice as relevant for them	Yes	No	No
	Reason why CYP didn't want to be part of study	Personal sensitive data	inputter free text entry	n/a	brief description of why the eligible young person didn't want to take part in the study/ evaluation despite being eligible to take part.	To monitor characteristics of CYP not engaging in programme, to check there is no system bias or discrimination preventing young people taking part or other reasons that may indicate certain cohorts do not see Your Choice as relevant for them	Yes	No	No

Drop down input boxes

Gender	Ethnicity	Disability	LGBTQ+	Most relevant primary need	Age
